Cerchio Sink Mixer by *Phoenix*

BATHROOM, KITCHEN & LAUNDRY BOOK

The process of building or renovating your bathroom, kitchen and laundry is both exciting and daunting. With so many design and style choices available, the possibilities are endless!

Whether you've got a clear picture of your dream bathroom, kitchen and laundry in mind or need some guidance, the Tradelink Bathroom, Kitchen & Laundry Book presents a huge range of options to consider for your renovation or build.

Be inspired by the huge selection of on-trend products and design ideas in this book. With an extensive range of vanities, tapware, baths,

basins, toilets, showers, accessories and tiles from leading and trusted brands, finding the perfect piece has never been easier!

If this is your first build or renovation, our handy Before You Start section (pages 6 and 7) is a good starting point to learn more about the build/renovation process and what you'll need to do to prepare for it.

No matter your style or budget, Tradelink has what you need to help bring your dream bathroom, kitchen and laundry to life!

Let this book be your guide.

BEFORE YOU START

When you’re building, renovating or updating, planning is the key. We’ve included some important things to consider when you’re getting started.

When you’re taking the first steps in your build or renovation journey, there is so much to consider, it can seem overwhelming. The right budget and planning can help the process run more smoothly, giving you greater peace of mind.

RESEARCH

With so many online resources on hand, it’s easy to find reliable information about design, products, materials and fixtures. Once you’ve got a rough idea of what it is that you want, speak with experts in the field like architects, building and renovation experts, and run plans and budget past them to see if you’re on the right path.

DESIGN AND FUNCTIONALITY

The design phase of your renovation or build is usually the part where you have the most fun. Experiment with different looks, styles and tones to see what works for you and your space. Test how each element of the room (such as tiles, flooring, paint, products and fixtures) will work together through a mood board or by taking inspiration from designs featured on social media or in magazines.

It’s easy to get carried away with designs but remember that functionality is equally important. You don’t want a beautiful above counter sink if your vanity is tall or nobody will be able to use it! Consider the height and width of the products

and how each will work together in the space with function as well as design.

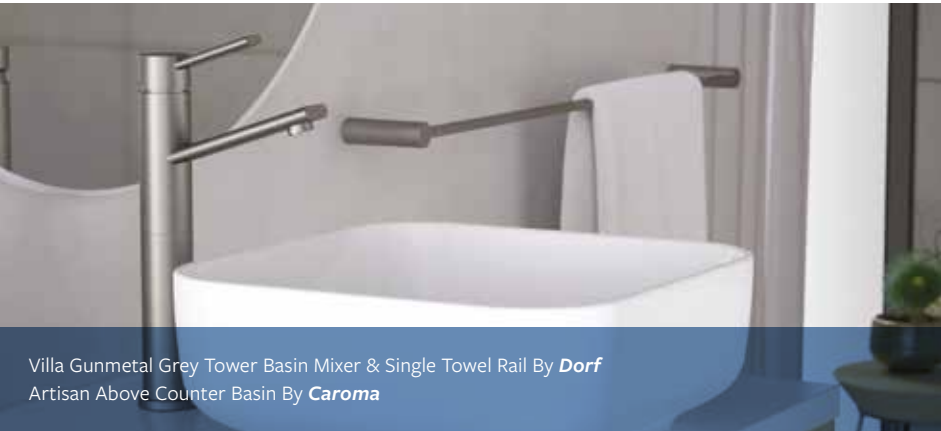

PLAN AHEAD

To ensure there are no budget blow-outs or project delays, know exactly what you want to achieve upfront. Realising halfway through the project that the paint you’ve purchased doesn’t work with the vanity can cause a lot of stress and money to fix. Mood boards can help with figuring out design issues early on and running product choices past your building contractor and plumber before you buy can make sure you

don’t buy something that is the wrong size, shape or type for the space.

REALISTIC BUDGETING

It’s easy for your budget to get out of hand with the unexpected costs that arise throughout the build or renovation. Create a detailed budget with quotes itemised for each of the key costs before you start and run this past industry professionals before getting a loan or purchasing materials or product. Unexpected costs will likely occur throughout the project, so make sure there is enough room in your budget to cover these.

Villa Gunmetal Grey Tower Basin Mixer & Single Towel Rail By **Dorf**
Artisan Above Counter Basin By **Caroma**

PLANNING CHECKLIST

- ☐ **Plan it:** Make sure you have your room measurements on hand, a list of any structural features/obstacles (such as doors and windows). Take photos of the space from as many angles as you can.
- ☐ **Features:** Think about what you want from the space (e.g. toilet in the same or separate room) and create a list of any must-have features that could impact the room design such as freestanding/built-in bath, heated/unheated towel rails or open/enclosed shower.
- ☐ **Get inspired:** Create a mood board with the finishes, materials, colours and products you want to include. Bring this with you to meet with your Showroom Consultant so they can help guide you to the perfect products to bring your style to life.
- ☐ **Set a budget:** Get quotations for your preferred fittings, tiles and tiling, plumbing, painting, design, demolition, electrical, carpentry, plastering, water-proofing, accessories, use this to give you a guide for your budget. Expect to spend two-thirds of your budget on labour and the remaining third on everything else.
- ☐ **Select your contractors/tradesmen:** Ensure that the building contractors and tradesmen working on your project are qualified and licensed for the job. Get multiple quotes and read reviews on Google or on their social media pages.
- ☐ **Draw up plans and get building permits:** Building permits must be submitted by a registered building practitioner such as an architect, registered builder or building designer. You will need permits for any building, plumbing or electrical changes or changes to utilities.
- ☐ **Product selection:** After running your preferred products past your building/plumbing contractors, book in a product selection consultation with your Tradelink Showroom Consultant. Order materials early in the process to ensure they are delivered in time for installation and avoid any project delays.
- ☐ **Create a realistic timeline:** Figure out a realistic timeframe for the project. It can take anywhere between 4 to 12 weeks or longer to complete a renovation depending on the scope of works and new builds can take up to 6 months to complete works. Work with your building contractor to help establish a realistic timeline. If you’re renovating, you’ll also need to consider alternative living arrangements during the building works such as a temporary bathroom or kitchen space, or renting a house.

TROPICAL SPA

Transform your bathroom into a spa oasis where you can escape the hustle and bustle of the outside world and take time to rejuvenate. Take the Caroma bathroom below which reflects a relaxing, calm environment whilst bringing the tropical outdoors in. To recreate this look follow our key tips.

PRODUCT SELECTION TIPS

BATHTUB CENTREPIECE

Create a statement with your bathtub and make it a key feature in your bathroom. In a spa, the bathtub is the centrepiece, don't let it hide in the corner and opt for a freestanding bath.

BRING THE TROPICS INDOORS

Don't be afraid to bring the great outdoors inside, green foliage will complete the look by bringing a sense of freshness and tranquillity. Be sure to research the perfect plants that are suitable for indoor use.

Contura Solid Surface Freestanding Bath 1700 | Freestanding Black Bath Mixer | 530 Solid Surface Inset Basin | Black Wall Basin/Bath Mixer by **Caroma**

HAMPTONS

Hamptons style is inspired by relaxed coastal living and although not all of us have the pleasure of living beachside, we can help you recreate that look in your bathroom. When you think Hamptons, you imagine light airy colour palettes, quality materials and an overall classy elegant design with a hint of vintage. Follow our key tips to create this look in your bathroom.

PRODUCT SELECTION TIPS

COLOUR PALETTE

The Hamptons style colour palette focuses on a neutral coastal colour palette, think white, grey and blue. Take the colour scheme from the Fienza Hamptons range above which has the perfect mix of white and grey colour scheme with a splash of green. Although overwhelming dark colours are a big no-no for this style of bathroom, in recent times designers have included a subtle hint of dark colours to bring the vintage style to the modern-day bathroom with matte black fixtures.

NATURAL TEXTURES

Natural textures work hand-in-hand with the Hamptons style. Once you've selected your fixtures don't forget to finish it off with organic materials like beach shells, wicker and timber to really style your bathroom.

COLOURS

COLOURS

Strategic use of colour in a bathroom can bring even the most ordinary of spaces to life. Applying colour to your tapware, accessories, vanities, tiles, paint or even decorative items such as vases can add style and statement to your home.

Bold gunmetal, gold, brass and rose gold finishes for tapware and accessories continue to trend and look striking against charcoal, black or hunter green colour schemes or more whimsical pastels like misty blue or pale pink. The colour you choose reflects the kind of atmosphere you want to create.

PRODUCT SELECTION TIPS

DRAMA – DARK HUES

Rich, dark hues like black, charcoal, forest green and midnight blue paired with statement gold or brass tapware and accessories can build a sense of drama in your bathroom.

ENERGY – BOLD COLOURS

If you're looking for a room that is full of energy to wake you up, bold colours like firetruck red, electric blue or canary yellow can capture a feeling of spontaneity and fun. Use bold colours as an accent paired with a more neutral colour to allow it to take centre stage in your design.

CALM – PASTEL PALETTE

If you're looking to create a relaxing, calm atmosphere then consider a pastel palette. This colour palette is complimented well with gunmetal or black tapware and accessories.

NATURE – NATURAL COLOURS

Bring the warmth of nature inside with earthy tones like terracotta, sepia brown, ochre or tan, or lush soft tones like sea green and teal. These colours pair beautifully with elements from nature like plants, timber or stone finishes.

Villa Gunmetal Grey Basin Mixer by *Dorf*

DESIGN CONSIDERATIONS

MOOD BOARD

Before locking in your colour scheme, collect samples of the tiles, paint swatches and finishes you're leaning towards and assemble them on a mood board to test how the colours and finishes work together. Seeing it all together can help identify anything that doesn't work in the scheme.

60/30/10 RULE

Figuring out where to use colour can be daunting but if you use the 60/30/10 rule, you can't go wrong! Select a neutral or light colour for 60% of the room, a secondary colour (usually a richer hue) to support the dominant colour for 30% and a bold accenting colour for final 10% of the room such as tapware and accessories.

LIGHTING

Make sure you take the lighting of the room, both natural and artificial, into consideration when choosing your colours as it will affect how they look and the functionality of the room. Darker palettes will need plenty of lighting to offset the darkness they create.

SPACE SAVING SOLUTIONS

SPACE SAVING SOLUTIONS

Round Wall Basin | Matte Black/Brass Blade Basin Mixer and Wall Mixer by *Clark*

The bathroom can often be the smallest room in a house. The introduction of tiny houses, smaller building footprints as well as demand for more space in the family home has encouraged the need and development of functional space saving bathroom solutions. Here at Tradelink, we’ve got you covered with some of the most innovative space saving bathroom products available!

PRODUCT SELECTION TIPS

WALL HUNG VANITIES

Choose a wall hung vanity or toilet to free up floor space and create the illusion that there is more space.

MIRRORS AND SHAVING CABINETS

Mirrors reflect light and create the illusion of space. Mirrors set on the front of a cabinet and off the wall create extra depth.

TOWEL LADDERS

Towel ladders provide plenty of hanging space vertically and in one location.

FIXED OVERHEAD SHOWER

An overhead shower eliminates the need for wall space for fixtures.

UNDERMOUNT BASIN

Choose an undermount basin which sits just below the bench top surface. Wall mounted mixer taps will also free up more vanity or bench space than traditional basin set fixtures.

Round Wall Basin Matte Black/Brass Basin Mixer by *Clark*

DESIGN CONSIDERATIONS

COLOUR CHOICES

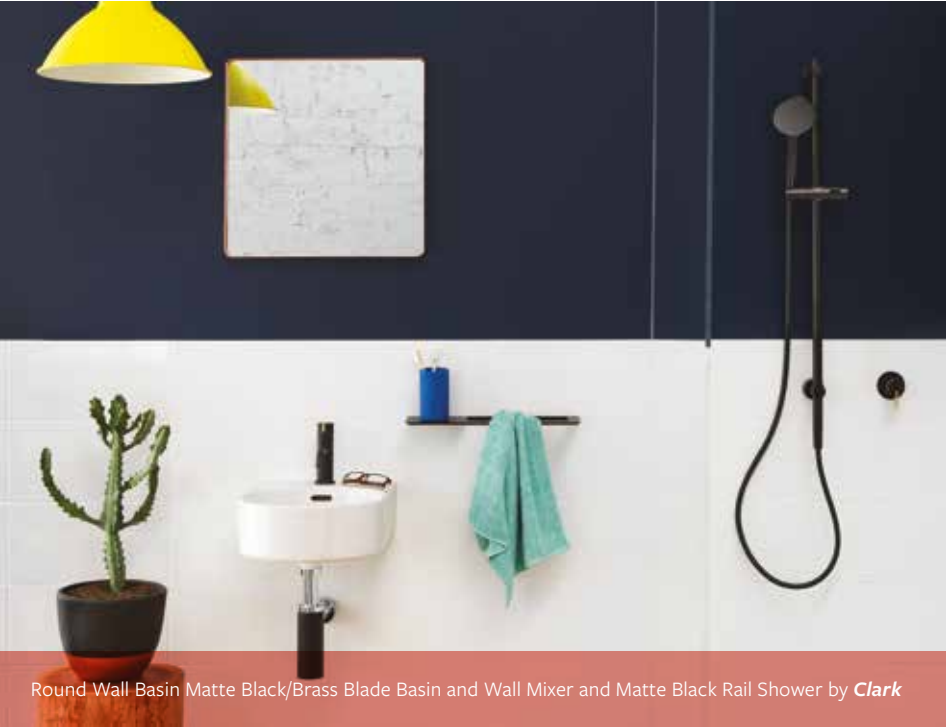

Make the bathroom feel open and bright by picking white or neutral tiles and fixtures.

TILES

Choose large tiles, these make the space feel bigger which means you will need less grout.

DOOR PLACEMENT

If you have a choice, be careful about where you place the door and the type of door, so that it doesn’t impact space. Sliding doors and doorless or open showers are space saving options.

Round Wall Basin Matte Black/Brass Blade Basin and Wall Mixer and Matte Black Rail Shower by *Clark*

ASSISTED LIVING

ASSISTED LIVING

Elegance Lever Care Basin Set | Opal 720 Wall Basin with Shelf | Elegance Lever Wall Top Assemblies | Home Collection Chrome Grab Rail Shower Set 900mm | Straight Grab Rail, 600mm | Chrome Folding Double Grab Rail 750mm | Opal Cleanflush® Easy Height Wall Faced Close Coupled Suite by **Caroma**

At Tradelink, we understand the importance of solutions for assisted living. When it comes to bathrooms, it’s imperative that the usability, safety, accessibility and comfort are all catered for. We have a range of products available which takes this into consideration while still providing a stylish finish for your bathroom. Before selecting the products, it’s important that you consider the user, space and product selection.

DESIGN CONSIDERATIONS

THE USER

- Left or right handed?
- Is the user tall or short?
- What capabilities does the user have and will their condition change?
- Is the user overweight?

THE SPACE

- How much space do you have to work with?
- How many people will be using the bathroom, do they have access and mobility requirements?

Opal Cleanflush® Easy Height Wall Faced Suite with Nurse Call Armrests | 900mm Twin Shelf Wall Basin (with optional shroud) | Skandic Basin and Shower Mixer and Virtu Plus Starsafe II Inverted T Shower Set by **Caroma**

PRODUCT SELECTION TIPS

SPACE SAVING TOILET WITH OPTIONAL SUPPORT ARMS

Choose a space saving toilet perfect for a small or even large bathroom with a need for more space for manoeuvring around the room. Need additional support? Select a suite with adjustable support arms with a built-in toilet roll holder.

EXTENDED SINGLE/DOUBLE LEVER TAPWARE

Extended single or double lever taps aid smooth handling and easy operation. This also features anti-scald technology, perfect for those with restricted movement or care facilities.

WALL BASIN WITH RH/LH SHELF GRAB RAILS

Do you require additional shelf space? Opt for a basin with a left or right hand side shelf with easy access, perfect for storing toiletries.

Aid your independence by providing additional support and balance assistance with grab rails to help prevent slips and falls in the bathroom.

Liano Cleanflush® Easy Height Wall Faced Suite With Double Flap Seat | Opal 720 LHS Wall Basin & Stroud | Elegance Lever Care Basin Set | Home Collection Chrome Grab Rail Shower Set – 900mm | Chrome Grab Rail Straight in 300mm & 900mm By **Caroma**

OUR SHOWROOMS

With 160 showrooms across the country, get the inspiration and expert advice you need to create your dream bathroom, kitchen and laundry with Tradelink.

Here at Tradelink we have over 150 years of experience in the industry offering a large selection of products that combines quality with style. We have over 160 Showrooms across Australia displaying a huge range of bathroom products from leading and trusted brands.

Our Showrooms showcase all the latest bathroom, kitchen and laundry styles, trends and colours. Get a feel for which product selection is right for you and compare brands side-by-side.

Our team of Showroom Consultants can assist you when selecting bathroom products for all your installation requirements.

Whether you need some ideas or have some in mind already, our Showroom Consultants can help you choose the right selection for your build or renovation.

NEW-LOOK SHOWROOMS

New-look showrooms are currently being rolled out across the country. The key feature of these showrooms is to give you a huge range of on-trend products to choose from and allowing you to see and touch a wider selection in the showroom.

Our new-look showrooms also feature real-life bathroom displays so that you can fully immerse yourself and give you inspiration on what your bathroom could look like.

GETTING STARTED

When it comes to buying product for your bathroom, kitchen or laundry, you can go at it alone, sourcing each individual item and hiring professional tradesmen as required, or you may choose to use an interior designer, architect or builder.

Having developed strong relationships within the design industry, our Showroom Consultants are experienced in working together with clients and designers to accurately specify product according to plans and budgets.

HOW TO GET THE MOST FROM TRADELINK

Call into your nearest Tradelink Showroom, let us know what time you will be coming and we will make sure one of our specialists is available to answer all your questions. Our Showroom Consultants will work together with you or your designer to ensure you have all the products and installation items to finish the project.

They will also provide all the quotes and specification details required for your builder or plumber. Tradelink will order the goods for you once the deposit is paid, ensuring your products will cost you exactly as per the stated quotation.

NB: Supply availability and product codes may change throughout the year. Tradelink reserves the right to alter accordingly.

Visit page 116 for a full list of Tradelink Showrooms.

EXCLUSIVE BRAND

Raymor is one of Australia's most long-standing and trusted bathroom brands and is exclusive to Tradelink.

During its 70 year history Raymor has built a reputation for innovation, quality and design excellence. From sleek, smooth lines to contemporary class, Raymor is proud to have played a leading role in creating the character of Australian bathrooms, kitchens and laundries.

*"More reliability,
more quality
and more style"*

We stand strong in our beliefs of classic design, superior engineering, low maintenance and outstanding value to deliver more reliability, more quality and more style.

Oliveri

KITCHEN / BATHROOM / LAUNDRY

FEATURED BRAND

Oliveri has come a long way from the unassuming Adelaide factory where their business first began way back in 1947. Today, Oliveri is the only commercial pressed bowl sink manufacturer in Australia and one of this country's best homegrown success stories. While their thriving Adelaide factory continues to create Oliveri's famous stainless steel sinks, they have expanded their offering to include an array of quality, imported kitchen and laundry sinks, taps, and now, a full bathroom collection.

*"Oliveri is the
only commercial
pressed bowl sink
manufacturer
in Australia"*

In 2019 Oliveri launched an exciting new collection of premium and contemporary bathroom products.

The Oliveri Bathroom range is produced in respected factories around the globe, with products inspired by the latest design trends and backed by industry leading warranties.

Explore over 220 new products from this iconic Aussie brand across basins, taps, toilets, baths, showers and accessories.

Barossa Vanity by *Marquis*

VANITIES

DESIGN CONSIDERATIONS

Space is usually a premium in bathrooms, and vanities often provide an efficient way to store items when they are not in use. Your vanity will need to look good, fit the plumbing and space (including how the doors open) as well as provide its primary function: to wash, clean and store.

IMPORTANT TIPS

- Plan for plumbing and electrics – consult with your plumber and electrician before locking in where the vanity will be located. Plumbing and electrical requirements could limit where your vanity can be located.
- When designing their bathroom most people start by choosing their tiles and colour scheme, so in order to make the right colour choice for the vanity, it's a good idea to take colour swatches with you.
- Consider how much storage you need for your toiletries and cleaning products.
- The perfect vanity takes time to be built – this requires your attention early in the selection process to minimise delays and avoid complications to your renovation or build.

SOME IMPORTANT QUESTIONS TO ASK YOURSELF ARE:

- Do I prefer wall-mounted or freestanding?
- Do I want a single or double basin (this will determine width of the vanity)? Will the basin be semi-recessed, above counter or wall hung?
- What finish do I prefer? Options include stone, marble, timber and laminate. Each will have different longevity.
- Will children or elderly people be using the vanity? If so, then consider how the height of the vanity may affect them.
- Do my fixtures fit well with the design of the vanity?

TAPWARE

DESIGN CONSIDERATIONS

Tapware can really enhance the look and design of your bathroom. Even a simple tapware swap can lift the mood in a bathroom. It's important to choose the right tapware to suit the room.

TAPWARE OPTIONS

- **Three-piece tapware:** This refers to a spout with two separate taps for hot and cold. Perfect for heritage or older homes, three piece tapware can come in both traditional and contemporary styles.
- **Basin mixer tapware:** If you're after a more contemporary look, then a mixer could be the perfect fit. With hot and cold water being seamlessly blended and controlled via the single handle, temperature is easy to control.
- **Pin lever handle:** If you're after bold and unique tapware, look no further than pin lever handles. Named for the thin pin shape of the handle, it is surprisingly versatile. Both three piece and mixers can feature pin lever handles.
- **Flat handle (round or square):** Also known as a paddle handle, flat handles are typically found with basin mixers. Offering a timeless and modern look that suits a variety of different bathroom styles.
- **Blade handle:** Named for their thin, blade like shape, blade handles offer a sharp, sleek design that is perfect for contemporary bathrooms.
- **Crosshead handle:** Perfect for more traditional style bathrooms, crosshead handles (shaped like a cross) emulates old-world charm.

SOME IMPORTANT QUESTIONS TO ASK YOURSELF ARE:

- Do I use this tap a lot and is it nice to touch and manoeuvre?
- What don't I like about my current tapware?
- Does it work with the style of my vanity and basin? Taller taps work better with above counter basins for example.
- Is it going to work with my current water pressure and plumbing? If you're upgrading your three-piece tapware, you may be limited to replacing it with three-piece unless you're willing to get the plumbing replaced.
- Do young children or elderly people use the tapware? Consider tapware that caters for their abilities.

Gunmetal Grey Inca Sink Mixer by **Dorf**

KITCHEN TAPWARE

DESIGN CONSIDERATIONS

Kitchen tapware not only needs to look good and fit the style of your kitchen but also serve its primary function: delivering water for drinking, cooking and cleaning.

TAPWARE OPTIONS:

- **Mixers rule the kitchen:** Like basin tapware, kitchen tapware comes in both three piece or mixer styles but mixers are by far the more favoured design for kitchens. Single-handle mixers offer the benefit of being able to be turned on without using hands (perfect if you've got your hands occupied and need to use an arm will do) and don't require as much force to turn on and off.
- **Pull-out/pull-down spray:** Perfect for the master chef in the home, pull-out/pull-down sprays are an extendable hose that you can pull out from the spout to increase the tap's reach. This allows you to angle the spray, making it perfect for cleaning pots and pans and cleaning veggies.
- **Goose-neck spout:** If you're after a more classic, elegant look, the goose-neck spout with its long, curved design exudes sophistication.
- **Right angle spout:** For kitchens with a contemporary, edgy design, right-angle spouts are the perfect fit. Named for their right-angle shape, they can create a bold statement.

WHAT MAKES A GOOD KITCHEN TAP?

- Your tapware can be the centrepiece or a low-key functioning tool for your kitchen.
- Ergonomic single-handle mixers can be a bit easier for arthritic hands to use.
- A solid cast, brass spout with minimal grooves can eliminate food build-up and will stand the test of time in a busy family home.
- The better the quality of the cartridge, the better your tap will perform under high use.
- Looking after your tap is just as important as selecting a well-made tap – warm soapy water is all that is required. Household cleaners and microfibre cloths may actually damage your tapware.

SHOWER TAPWARE

DESIGN CONSIDERATIONS

The right shower tapware can turn showering into a luxurious experience that you'll look forward to every day.

TYPES OF SHOWER TAPWARE:

- **Overhead shower:** For a shower experience that feels like bathing in summer rain, then look no further than the overhead shower. Positioned so that the shower head is directly above you (no angle), this type of shower tapware provides a luxurious and immersive experience.
- **Rail showers:** Ideal for families, rail showers are easily adjustable with users able to adjust height and angle. This is also an ideal option for people with disabilities who may need a lower height for their shower.
- **Hand shower:** Hand showers can be installed either at a fixed height or on a rail. The shower head can also be detached, making it easy to clean the shower. Hand showers tend to be more affordable than fixed wall showers and are usually more water efficient.
- **Wall shower:** Perfect for small bathrooms, wall showers are compact. They are also more durable than hand showers.
- **Dual showers:** Love overhead showers but want the flexibility of switching to a hand shower? Dual showers offer the best of both worlds.

IMPORTANT TIPS

Shower tapware requires planning and a good understanding of the household's needs before selection can take place. Think about who will use the shower as the tapware will need to meet the needs of all of its users. Consider the following:

- Rail length
- Position
- Adjustability
- Spray pattern
- Water usage

Understanding your water pressure and selecting the correct mixer helps to make your shower experience more efficient and enjoyable. Unequal pressure is a common situation for renovated homes. Your shower mixer will need to equalise the higher flow of the cold to the hot before it can deliver a comfortable shower temperature for the lower pressure.

Mains pressure is the ultimate in water efficiency and function – if you get the opportunity to upgrade your water system to mains, it will prove to be a good investment that will not disappoint. Most taps will work well on mains pressure. WELS Rating is a great tool to guide you for water efficiency.

SHOWER SCREENS & ENCLOSURES

DESIGN CONSIDERATIONS

Shower screens and enclosures are often underestimated with bathroom renovations. They can subtly compliment the overall design of the space as well as provide a key functional role in the shower space.

When considering what kind of shower screen or enclosure you want, think about the dynamics of the space and size available. Ask yourself about usability and what kind of door or entry system is required. One thing to look for in a quality shower screen and enclosure is a high tile tray lip to provide a good water seal.

SHOWER SCREEN & ENCLOSURE OPTIONS:

- **Frameless showers** – Create space and simplicity against a tiled wall. Note that frameless showers may leak water through the gaps between the glass and tiles unless a drip strip is added.
- **Flat, side and corner contours** – One piece, seamless acrylic wall lining for your complete storage system and easy cleaning.
- **Acrylic walls** – Many options are available with a variety of sizes, with or without corner soap and shelf recess, and shaving foot rests.

IMPORTANT TIPS

When you're at the planning stage of the bathroom, consider all options for the shower area and acquire the services of a reputable installer.

- **Watertight:** The shower needs to be watertight against the walls. All shower options available in Australia will stand the test of time, providing they are installed correctly. It gets increasingly expensive to make changes, as each stage is completed.
- **Bracing:** Put extra bracing in the walls if you think you may want to add a grab rail, shelf or seat later on. A glass door or screen requires good bracing. Stand in the space to mark out where you want the shower nozzle to come from and a comfortable height for the mixer.
- **Tiled recess:** If you want a tiled recess for soaps, shower gels and shampoos, that needs to be considered before the lining goes in. It will be too late once the walls are tiled.
- **Airflow:** You may want a spacious shower but will you be warm with all that airflow around you – select a fan heater and extractor suitable for the size of your bathroom.

BATHS

DESIGN CONSIDERATIONS

Baths are the essence of luxury. Bathing can help you relax and wind down at the end of a busy day and offers routine to a family with small children. The right bath can also add value to your home.

TYPES OF BATHS:

- **Inset:** Inset baths can suit almost any bathroom and sit flush to the wall, usually in a corner of the room. They are often more inexpensive and are often a good choice for smaller bathrooms. They can also incorporate shelving which is helpful when bathing small children. These types of baths can also double up as a shower where having both is not possible.
- **Island:** An island bath is like an inset bath but usually has a tiling bead edge so it can't be set exactly against a wall. This is for bathrooms with existing tiling.
- **Freestanding:** Freestanding baths make excellent centrepieces for your bathroom. This style of bath requires a fairly generous bathroom size and you will likely need freestanding taps. Freestanding baths can be positioned on the floor or be raised on feet.
- **Back-to-wall:** Blending the best of inset and freestanding baths, back-to-wall baths have a long edge of the bath against the wall. It is a good option if you like the look of a freestanding bath but lack the space. It is also more convenient for those who can't move their plumbing to accommodate freestanding tapware and for those who don't want the hassle of cleaning behind the bath.

IMPORTANT TIPS

- **What size bath do I need?** When designing your new bathroom, make sure that the bath you want fits. Not all walls can be assumed to be absolutely vertical or square, so make sure that you measure the distance between the walls at the height at which the bath will be at its longest and widest. Also when measuring unplastered or untiled walls make sure you take the finishing depth into account before choosing a bath.
- **Do I want any special features or functions?** Functions like bubble massage, spa, hydro or chromatherapy can add even more luxury to your bath and bathroom.
- **Bath weight:** Some baths will need structural support in the floor to handle the weight of the filled bath. Get a professional to do the inspection before locking in your bath choice.
- **Materials:** There is so much to choose from. Many baths are made from lighter materials such as fibreglass or sturdier materials like enamel and metal. Luxury tubs made be made from stone or concrete, which can resist damage but are a lot heavier and more expensive.

BASINS

DESIGN CONSIDERATIONS

A basin can often be a pivotal feature. It allows you to cater for your bathroom's functional needs, whilst also being a key centrepiece of your design.

Basins and vessels need to be practical, attractive and accessible to everyone. Consider who will be using it: will it just be for washing hands and cleaning teeth, or will there be a man using it for a wet shave? The installation and positioning are important when interpreting these needs.

TYPES OF BASINS:

- **Above-counter/Vessel:** Sitting on top of the counter or vanity, above-counter/vessel basins create a wonderful centrepiece or statement in a bathroom. This style of basin will need wall-mounted or tall/tower basin mixers. Be conscious of the height of your benchtop/vanity combined with the basin, particularly with shorter users.
- **Under-counter:** Also known as undermount basin, this is a basin that is installed under a countertop. This usually requires the exact shape of the counter to be cut out from the countertop to fit it. Offering a classic look, this style of basin is easy to clean.
- **Self-rimming:** Similar to the undercounter, self-rimming basins will be installed into the countertop. The key difference is the higher profile rim along the top. Self-rimming basins are also installed from above, as opposed to the under-counter which is installed from below. This style of basin is easier than the under-counter basin to change without causing issues for the countertop.
- **Semi-recessed:** Semi-recessed basins are installed partly into the counter with part of the basin protruding to the front of the benchtop. This is a good solution where you have limited bench space, allowing a relatively large basin to be installed on a smaller counter. Like the self-rimming and under-counter, a space will need to be cut out from the counter to the exact dimensions of the basin.
- **Semi-inset:** Inset basins, are partially mounted into the counter with the majority visible at the top. This allows space for storage under the counter or vanity.
- **Wall-hung:** Also known as wall-mounted, this is a basin that hangs off the wall in your bathroom. This works well with minimalist style or smaller bathrooms. Just keep in mind, you will likely need additional structural support in the wall to hold the weight of the basin.
- **Pedestal:** This style of basin is perfect for smaller bathrooms where there is no need for storage. The plumbing is concealed in the pedestal.

MATERIALS

Consider the material you'd prefer your basin to be made from. There are a variety of options available, each with their own benefits including: china, cast bronze, brass, glass, composite stone and quarry cast.

Aura Basin Mixer | Eco Bottle Trap - Blanc by **Caroma**

Aruba Square Bath, Leigh Filler and Byron Wall-Hung Toilet by **Raymor**

TOILETS

DESIGN CONSIDERATIONS

With trendy designs and cisterns that can be hidden from view, toilets are no longer something to be hidden away.

TYPES OF TOILETS:

- **Back-to-wall (BTW):** These toilet suites sit flush to the wall, therefore the inlet and waste pipes can be concealed and cleaning is easy.
- **Close Coupled:** The toilet cistern sits near the wall and the rear of the pan is offset from the wall.
- **Wall-Faced:** Only the toilet pan is visible and the cistern is concealed behind the wall. These are ideal for small bathrooms.
- **Wall-Hung:** Similar to wall-faced, only the toilet pan is visible, however this style of toilet has a space underneath that is perfect for a minimalist or modern appearance.
- **Comfort / Easy Height Suites:** Increased pan height for your comfort.

IMPORTANT TIPS

- **Toilet pans:** Style is only half the story for toilets, you'll also need to choose a toilet pan. The two most common types kinds of pans available are S-trap and P-trap. The trap refers to the bend in the pipe that transports waste from the toilet to the sewer or septic tank. S-trap waste pipe connects to the floor and P-trap pipe connects to the wall.
- **Check with your plumber:** Before choosing a toilet, check with your plumber, especially if renovating. You'll need accurate "set out" measurements – for an S-trap toilet, this is the distance from the wall to the centre of the waste outlet and for a P-trap toilet this is the distance from the floor to the outlet.
- **Water efficiency:** Dual flush toilets are a must for water efficiency, giving you full and half flush options. WELS ratings can help you choose a toilet that will help you reduce your water consumption, which will save you money and help reduce your impact on the environment. The higher the WELS rating, the less water is used to flush the toilet. Some councils will require a minimum WELS rating for your toilet, so be sure to check this first.
- **Sit on it:** How do you know which toilet is going to suit you? It's best to sit on them. Sometimes a toilet can look fabulous in design, but it is not really that comfortable.
- **Test how the seat lifts:** Some seats are warmer and softer to the touch. Soft closing seats are now included with most toilet suites.

KITCHEN SINKS

DESIGN CONSIDERATIONS

The kitchen sink is an integral part of the kitchen design. When selecting a sink make sure that it's practical, durable and functional for your needs. Kitchen sinks can also be used as a statement piece exuding luxury, sophistication and elegance.

TYPES OF SINKS:

- **Topmount:** This style of sink is installed on top of the bench with the rim sitting on the benchtop to hold it in place. They are easy and cheap to install, making them one of the most popular styles.
- **Undermount:** Installed directly under the counter, the undermount sink creates a more streamlined look for the counter. A cavity will need to be created in the counter that fits the exact dimensions of the sink and will need additional support under the sink to hold it in place.
- **Flushmount:** This is a compromise between topmount and undermount with the sink installed from the top and has a precise cavity created for the sink to sit into so that a rim is not required. Like the undermount, it has a more streamlined look.
- **Farmhouse sink:** Otherwise known as a Butlers Sink this style is set into the benchtop. Without a benchtop between the user and the sink, it is more comfortable to use for longer periods. It is also typically a lot deeper, making it perfect for washing large pots or trays.

IMPORTANT TIPS

Cabinet size – Is your cabinet wide enough (left to right) and deep enough (front to back) to accommodate the bowls of your sink?

Configuration – How many bowls do you want, how many drainers (if any) and do you require the bowls on the left or right hand side?

Bowl size – How do you use your kitchen sink and what type of cooking do you do?

Finish – Do you want to create a statement by choosing a standout piece in copper or gunmetal for instance or are you looking for a more traditional, stainless steel sink?

LAUNDRY TUBS & CABINETS

DESIGN CONSIDERATIONS

Laundry room tubs and cabinets can offer convenience in every home, whether you need to hand-wash clothes, treat stains or store away your detergent, they're a must have in every laundry room.

TYPES OF LAUNDRY TUBS:

- **Undermount tub:** Undermount tubs are installed underneath the counter.
- **Overmount tub:** The overmount tub is installed so the rim sits on top of the counter.
- **Tub & cabinet floorstanding unit:** If you've got limited space in your laundry, a tub and cabinet floorstanding unit can be a great way to get both storage and a tub.

IMPORTANT TIPS

Size – Measure up the space you have available before going shopping for a unit. If you're adding a tub to a bench, ensure it's deep enough for the laundry sink.

Use of the sink – Are you in a large, medium or small household? The larger the household, the larger the sink and greater the storage space you'll need in your laundry.

Materials – Laundry tubs and come in a variety of materials including, acrylic, cast iron, stainless steel and ceramic.

Pull down sink mixer – Consider installing a pull down sink mixer. This style of mixer not only looks great but makes hand-washing clothes a breeze.

ACCESSORIES

DESIGN CONSIDERATIONS

Many accessories are now designed with a bathroom range in mind and a focus on aesthetics as much as technical functionality – they are designed to match particular tapware, toilets and sanitary-ware.

TYPES OF ACCESSORIES:

- Heated or unheated towel rails
- Soap dishes or recesses
- Robe hooks
- Toilet roll holders
- Tap drains and wastes (for basins and showers)
- Flush plates/buttons (for back-to-wall toilet suites)
- Water filtration

IMPORTANT TIPS

These are the finishing touches for your bathroom, so it's important to make sure the style is in keeping with the other products. If it's a new build, make sure you advise the builder of where you want to place the accessories so extra wood can be put behind the wall for added strength.

Featured brands

Cottage – Fan Shape Tiles White by *Everstone*

EVERSTONE TILES

DESIGN CONSIDERATIONS

Tiles and mosaics are the bedrock of any sophisticated interior, expressing a sense of understated elegance and class. Once laid, tiles are often kept for 10+ years, and thus the importance of getting the right tile cannot be underestimated. Whatever your indoor inspiration, Tradelink* has a variety of tiles to suit every need and budget. From quality Italian and Spanish tiles, to bespoke mosaics, a Tradelink representative can help find the right tile for you.

**Everstone Tiles are on display in select stores, check online at tradelink.com.au.*
